(54) CLEANING METHOD USING SUPERCRITICAL AND SUBCRITICAL FLUID

(57) Abstract:

PURPOSE: To clean even a material difficult to clean such as a shoe by further increasing the power of a supercritical fluid having an excellent dissolving power used in cleaning.

CONSTITUTION: A material 5 to be cleaned is dipped in a supercritical and subcritical fluid 6, if necessary mixed with an entrainer, in a pressure cleaner 3, and then the fluid 6 in the cleaner 3 is rapidly discharged outside the cleaner 3.

Otherwise, the content volume of the cleaner 3 is rapidly increased to rapidly expand the fluid 6, hence violent turbulence is caused or a large number of bubbles are generated on the surface of a contaminant, the contaminant is forcedly released or dissolved by the flowing or bubbling action, and the material 5 is cleaned.

LEGAL STATUS

[Date of request for examination] 19. 12. 1996

[Date of sending the examiner's decision
of rejection]

[Kind of final disposal of application
other than the examiner's decision of
rejection or application converted
registration]

[Date of final disposal for application]

[Patent number] 2832190

[Date of registration] 02. 10. 1998

[Number of appeal against examiner's
decision of rejection]

[Date of requesting appeal against
examiner's decision of rejection]

[Date of extinction of right]
